SOLDIER MODERNIZATION KIT

The Ultralife® SOLDIER MODERNIZATION KIT provides the dismounted soldier with leading edge communications, audio, RF processing, and intelligent power management technologies. Our kit benefits today's warfighter with a modular solution that adapts to changing mission requirements.

Future Soldier C4ISR programs often focus on conceptual solutions that are far off in the distance. Ultralife offers cutting-edge options to power virtually any manpack equipment. Choose what you need and Ultralife will integrate components into a streamlined solution.

See back cover for additional batteries

LI-145
Lithium Ion

In the field is no time to worry about whether or not you have juice. You have an array of handheld portable devices from radios, laptops, GPS, NVG, sensors and more that require power.

Ultralife offers primary and rechargeable batteries, power supplies, chargers, cables and more accessories to power virtually any manportable equipment fielded today.

We also offer custom engineered solutions. Have a mission-specific equipment problem? We offer many solutions tailored to the needs of the modern war fighter.

MBITR/PRC-152 Adapter

Our soldier-worn solution includes a number of peripherals important to being connected and staying connected on the move.

We offer a systems to enhance and power the AN/PRC-152, AN/PRC-148 and other military radios. In addition, it will power the A-320KT 20-watt amplifier as well as most other amplifiers currently on the market.

The A-320 Dual Port Adapter, a full-range of antennas, and other peripherals to include PC and GPS adapters may also be added to further customize your solution.

Antennas
SATCOM & LOS
